ISO IEC 38500 IT Corporate Governance
Manager

ISO IEC 38500 IT Corporate Governance Manager

Introduction:

This training program provides participants with the essential skills and knowledge required to manage IT corporate governance effectively, based on the ISO/IEC 38500 standard. It empowers them to align IT governance practices with organizational objectives, ensuring that IT investments are managed responsibly and strategically.

Program Objectives:

At the end of this program, participants will be able to:

- Understand the ISO/IEC 38500 standard and its principles for IT corporate governance.
- Develop and implement IT governance frameworks that align with organizational goals.
- Manage and oversee IT governance activities to ensure compliance and effectiveness.
- Communicate IT governance strategies and policies to stakeholders.
- Apply best practices to improve IT governance and risk management.

Targeted Audience:

- IT Managers and Directors.
- Corporate Governance Professionals.
- IT Governance, Risk, and Compliance Officers.
- Senior IT Auditors and Consultants.
- Aspiring IT Governance Leaders.

Program Outline:
