Policy Making

Policy Making

Introduction:

This training program offers participants a comprehensive understanding of the principles and processes involved in policy development. It equips participants with the knowledge and skills necessary to craft effective policies that address complex societal challenges and contribute to positive change.

Program Objectives:

At the end of this program, participants will be able to:

- Offer a comprehensive understanding of the policy making process, covering its stages, actors, and dynamics.
- Develop analytical skills required for policy analysis and evaluation.
- Cultivate critical thinking and problem-solving abilities crucial for formulating evidence-based policy solutions.
- Strengthen the capacity to engage stakeholders and facilitate consensus-building around policy initiatives.
- Empower members to lead and contribute effectively to the policy making process within their organizations and communities.

Targeted Audience:

- Policy analysts.
- Government officials.
- NGO leaders and staff.
- Researchers and academics.
- Advocates and activists.
