Conference: ISO Business Continuity
Management System 22301 Lead
Implementer

A group of four smiling business professionals (two men and two women) in a meeting room. They are wearing white shirts and are seated around a table. The background is blurred, showing a modern office environment with large windows and indoor plants. A blue curved graphic element is overlaid on the top right and bottom right of the image.

8 - 12 December 2024
Cairo (Egypt)

Conference: ISO Business Continuity Management System 22301 Lead Implementer

REF: C2149 DATE: 8 - 12 December 2024 Venue: Cairo (Egypt) - Fee: 4095 Euro

Introduction

No two tragedies in the world have the same impact on society. Because natural catastrophes, data breaches, and other incidents are unpredictable, being prepared can help you stand out from the competition and foretell your company's future. Given this, effective planning is crucial to reducing risks, avoiding repercussions, dealing with the negative effects of catastrophes and accidents, while still carrying on with normal operations to ensure that customers' needs are met.

Having a BCMS based on ISO 22301 in place can help organizations understand and manage risks, accidents, and disasters. As a result, created this training program to help participants construct a business continuity management system BCMS that complies with ISO 22301's criteria. By taking this training course, you may develop a framework that enables the organization to continue functioning effectively during disruptive events and obtain a thorough understanding of the best practices of the business continuity management system.

After attending the training course, you can sit for the exam and, if you successfully pass the exam, you can apply for the "Certified ISO 22301 Lead Implementer" credential. The internationally recognized "Certified ISO 22301 Lead Implementer" certificate will prove that you have the professional capabilities and practical knowledge to implement a BCMS based on the requirements of ISO 22301 in an organization.

Conference Objectives:

At the end of this conference, the participants will be able to:

- Give an explanation of the core ideas and guidelines of a business continuity management system BCMS based on ISO 22301.
- Read the ISO 22301 specifications for a BCMS from the implementer's point of view.
- Implement a BCMS based on ISO 22301 by starting the process and planning it using IMS2 Methodology and other best practices.
- Assist a business in running, maintaining, and enhancing a BCMS based on ISO 22301.
- Get a company ready for a third-party certification assessment

Targeted Audience

- Project managers and business continuity consultants
- Experts with extensive experience attempting to develop a business continuity management system
- Individuals in an organization who are in charge of maintaining compliance with BCMS requirements
