PIMS ISO IEC 27701 Lead Implementer

6 - 10 October 2024
Istanbul (Turkey)

PIMS ISO IEC 27701 Lead Implementer

REF: A2003 DATE: 6 - 10 October 2024 Venue: Istanbul (Turkey) - Fee: 5300 Euro

Introduction:

This program is designed to prepare participants for the certification exam only.

The Privacy Information Management System PIMS ISO/IEC 27701 Lead Implementer training program equips professionals with the knowledge and skills necessary to establish, implement, and maintain robust privacy management systems within organizations. It empowers individuals to champion privacy initiatives and enhance data protection practices in diverse organizational settings.

Program Objectives:

At the end of this program, participants will be able to:

- Implement and manage a Privacy Information Management System PIMS in accordance with ISO/IEC 27701 standards.
- Develop and deploy privacy policies, controls, and procedures to safeguard personal information.
- Conduct privacy risk assessments and implement measures to mitigate identified risks effectively.
- Monitor, evaluate, and continuously improve the effectiveness of the PIMS to ensure ongoing compliance with privacy regulations.
- Prepare for the certification exam.

Targeted Audience:

- Information security professionals aiming to broaden their expertise into privacy management and ISO/IEC 27701 implementation.
- Privacy officers and compliance professionals responsible for leading privacy initiatives within organizations.
- Project managers tasked with implementing privacy management systems and achieving ISO/IEC 27701 certification.
- Consultants and auditors seeking to specialize in privacy information management and ISO standards compliance.
- Executives and managers interested in understanding the importance of privacy management and its integration into organizational processes.

Program Outline:

Unit 1:

Introduction to Privacy Information Management System PIMS and ISO/IEC 27701:

- Understanding the importance of privacy management in modern organizations.
- Overview of ISO/IEC 27701 standard and its relevance to privacy information management.
- Exploring the principles and requirements of ISO/IEC 27701.
- Identifying key stakeholders and their roles in implementing a PIMS.
- Discussing the benefits of achieving ISO/IEC 27701 certification for organizations.

Unit 2:

Establishing a Privacy Framework:

- Developing a privacy policy and objectives aligned with organizational goals.
- Establishing processes for identifying and assessing privacy risks.
- Implementing controls to mitigate privacy risks and ensure compliance with regulations.
- Defining roles and responsibilities for managing privacy within the organization.
- Creating a privacy awareness and training program for employees within the organization.

Unit 3:

Implementing Privacy Controls:

- Implementing technical and organizational measures to protect personal information.
- Securing data processing activities and ensuring confidentiality, integrity, and availability of personal data.
- Implementing data minimization and purpose limitation principles.
- Establishing procedures for responding to data breaches and incidents.
- Integrating privacy by design and by default principles into systems and processes.

Unit 4:

Monitoring and Continuous Improvement:

- Establishing monitoring mechanisms to assess the effectiveness of privacy controls.
- Conducting regular privacy audits and assessments to identify areas for improvement.

- Implementing corrective actions and preventive measures to address non-conformities.
- Reviewing and updating the privacy management system in response to changes in the organizational context or regulatory environment.
- Promoting a culture of continuous improvement and privacy awareness within the organization.

Unit 5:

Preparation for ISO/IEC 27701 Certification exam:

- Understanding the certification process and requirements for ISO/IEC 27701 certification.
- Conducting gap assessments to identify areas for improvement.
- Developing a roadmap for achieving ISO/IEC 27701 certification.
- Documenting the implementation of privacy controls and processes for certification purposes.
- Preparing for the certification audit exam and addressing auditor inquiries effectively.

Note: This program is designed to prepare participants for the certification exam only.
