# Asset Management and Best Practices in Investment Management

REF: F2194 DATE: 29 December 2024 - 2 January 2025 Venue: Sharm El-Sheikh (Egypt) - Fee: 3520 Euro

## Introduction

For an asset management company to be successful, three things are required. First, the company must have an effective investment strategy. Second, the investment strategy must be implemented efficiently. Third, the company must successfully handle the non-investment elements of the business, such as marketing and compliance. This course covers all of these elements, exploring the perspectives of both asset managers and the individuals and institutions that provide capital to the managers. Asset management plays an important role in the economy, facilitating efficient saving for retirement, making financial markets more efficient, and allocating capital to companies and entrepreneurs with valuable ideas.

## Course Objectives

At the end of this course, the participants will be able to:

- Highlight best practices in asset management
- Define important objectives of effective investment policies and implementing them efficiently
- Understand, critique and refine advanced trading strategies used by hedge funds
- Recognize and evaluate key strategies in private capital and venture capital
- Incorporate these specific asset management skills into a broader business plan
- Interact with a leading academic in the asset management field through hand-picked case studies from industry-leading firms
- Discuss the future of the asset management industry, identifying key potential opportunities and risks.

## Targeted Audience

- Asset managers are looking to perfect and update their existing skills
- Ambitious Financial Services Managers looking to work in Asset Management
