

€ TRAINING

Financial Management for Projects and
Contracts

A group of four smiling business professionals (three men and one woman) are seated at a table in a meeting room. They are all wearing white shirts. The woman in the foreground is wearing a black top and a multi-strand necklace. The background is blurred, showing a modern office environment with large windows.

Financial Management for Projects and Contracts

REF: P334 DATE: 9 - 13 December 2024 Venue: Amsterdam (Netherlands) - Fee: 5565 Euro

Introduction:

This training program explores the financial metrics that are commonly used and also examines the less frequently thought-of economic impact of typical operating decisions and actions. Building on your competencies, you will examine the inner mechanics of how finance and accounting can impact your project.

Program Objectives:

At the end of this program, the participants will be able to:

- Enhance communication with accounting and financial personnel, and analyze accounting and financial data effectively.
- Expand project scheduling and cost control by incorporating additional financial metrics and tools to minimize project financial risk.
- Develop and apply tools for comparing project financial returns, understanding how finance influences organizational decisions and project performance evaluations.
- Learn standard financial analysis tools linking project management to corporate strategic goals, with case studies and exercises to apply these techniques effectively.

Targeted Audience:

- Project and Contract managers.
- Financial managers.
- Procurement managers and specialists.
- Project coordinators and administrators.
- Business analysts.
- Engineers and construction managers working on projects.
- Anyone else responsible for the financial aspects of project management and contract administration.
