Strategic Planning, Decision Making, and Management Skills

REF: ST1701 DATE: 23 - 27 December 2024 Venue: London (UK) - Landmark Office Space Fee: 5300 Euro

Introduction

Many Strategic Plans are created each year by spending weeks or months of activity to produce a detailed book of strategies that sits on the shelf for the next 12 months collecting dust. A Strategic Plan is not a one-time event. It is an ongoing effort with a lifecycle focused on enabling the organization to focus on its purpose and achieve its vision to satisfy its customers.

Every productive leader needs a plan to direct his thoughts and efforts in any organization. The purpose of strategic planning is to encourage thinking about your organization's "big picture" -- its broad goals and priorities, and how well they are being achieved. Unfortunately, the emphasis on possessing a strategic plan has come into some disrepute in recent years since research has revealed that many of them are never implemented and that others prove to be useless in organizations faced with rapidly changing, difficult to predict, environments.

Formal planning should be useful for strategic decision-making. Formal planning seems valuable for strategic decision-making because so much money is spent on it. Some of the companies that use formal planning believe that it improves profits and growth.

Course Objectives

At the end of this course the participants will be able to:

- Learn how to document why the Organization exists and where the Organization is going.
- Understand the Lifecycle of "Living" Strategic Plan
