

€ TRAINING

Production Planning and Control

A group of four smiling business professionals (three men and one woman) are seated around a table in a meeting room. They are all wearing white shirts. The woman in the foreground is wearing a black top and a multi-strand necklace. The background is a bright, modern office environment.

Production Planning and Control

REF: P250 DATE: 9 - 13 December 2024 Venue: Bangkok (Thailand) - JW Marriott Bangkok Fee: 6960 Euro

Introduction:

The Production Planning and Control program optimizes manufacturing efficiency through resource coordination and scheduling, ensuring timely and cost-effective production while maintaining quality. Production planning, scheduling activities, and controlling of processes represent essential activities to be performed and monitored by organizations as they implement their key processes, activities, and operations.

Program Objectives:

At the end of this program the participants will be able to:

- Think in terms of process-value added to customers and shareholders.
- Integrate the organization's strategic planning with production planning and scheduling.
- Understand the importance of production planning in a wider context of the overall success of the business.
- Explore traditional versus innovative production techniques.
- Consider the customer relationship with marketing and production.

Targeted Audience:

- Office Managers and Coordinators.
- Executive Secretaries.
- Administrative Assistants.
