Advanced Project Management Process
Groups Overview

A photograph of four business professionals (two men and two women) sitting around a table in a meeting room. They are all smiling and looking towards the camera. The woman in the foreground is wearing a black top and a multi-strand necklace. The background is slightly blurred, showing a modern office environment with large windows.

Advanced Project Management Process Groups Overview

REF: P1384 DATE: 25 November - 6 December 2024 Venue: Kuala Lumpur (Malaysia) - Fee: 7950 Euro

Introduction:

The Advanced Project Management Process Groups Overview program offers an in-depth exploration of the five key process groups in project management: Initiating, Planning, Executing, Monitoring and Controlling, and Closing. Designed for seasoned professionals, this program provides advanced insights into the intricacies of each process group, emphasizing strategic decision-making and effective leadership within complex project environments. Through a combination of theoretical learning and practical application, participants gain the expertise needed to navigate diverse project challenges and drive successful outcomes at an advanced level.

Program Objectives:

At the end of this program the participants will be able to:

- Understand the new concepts of Project Management created by PMI.
- Understand and demonstrate the project management process groups as per the PMBOK Guide 5th edition [Initiation, Planning, Execution, Monitoring & Controlling and Closing].
- Practice for the PMI professional exam [PMP, PMI-RMP, and SP].
- Determine the gap areas they may have and follow a road map to enhance their competency level.

Targeted Audience:

- Project managers and practitioners.
- Program managers.
- Construction, Corporate planning, Finance, and Marketing departments.
- executives, managers, and supervisors in government.
