

€ TRAINING

Advanced Maintenance Management and
Cost Reduction

A group of four smiling business professionals (two men and two women) are seated at a table in a meeting room. They are all wearing white shirts. The woman in the foreground is wearing a black top and a multi-strand necklace. The background is blurred, showing a modern office environment with large windows.

4 - 8 August 2024
Amman (Jordan)

Advanced Maintenance Management and Cost Reduction

REF: O1720 DATE: 4 - 8 August 2024 Venue: Amman (Jordan) - Fee: 4250 Euro

Introduction:

This training program is designed to enhance maintenance operations by focusing on development strategies to improve efficiency, evaluate effectiveness, and reduce operational costs. Participants will gain insights into best practices, tools, and methodologies essential for optimizing maintenance processes.

Program Objectives:

By the end of this program, participants will:

- Understand the importance of efficient maintenance operations.
- Develop strategies to enhance maintenance efficiency and effectiveness.
- Learn methods to evaluate and measure maintenance performance.
- Identify opportunities for cost reduction and resource optimization in maintenance.
- Implement improvements to achieve sustainable maintenance practices.

Target Audience:

- Maintenance managers and supervisors.
- Maintenance technicians and engineers.
- Operations managers involved in maintenance planning.
- Facility and asset managers.
- Employees interested in improving maintenance operations and reducing costs.

Program Outline:

Unit 1:

Introduction to Maintenance Management:

- Importance of Effective Maintenance Operations.
- Role of Maintenance in Overall Business Operations.
- Key Performance Indicators KPIs for Maintenance Efficiency.

- Maintenance Strategies: Reactive vs. Preventive vs. Predictive.

Unit 2:

Enhancing Maintenance Efficiency:

- Lean Maintenance Principles and Practices.
- Total Productive Maintenance TPM Techniques.
- Root Cause Analysis RCA for Maintenance Issues.
- Implementing Maintenance Optimization Programs.
- Integrating Technology in Maintenance Operations.

Unit 3:

Evaluating Maintenance Operations:

- Performance Metrics and Benchmarking.
- Assessing Maintenance Effectiveness.
- Continuous Improvement in Maintenance Processes.
- Auditing and Reviewing Maintenance Procedures.
- Feedback Loops and Corrective Actions.

Unit 4:

Cost Reduction Strategies:

- Cost Analysis and Budgeting in Maintenance.
- Implementing Cost-Effective Maintenance Practices.
- Inventory Management and Procurement Optimization.
- Energy Efficiency and Resource Conservation.
- Case Studies on Successful Cost Reduction Initiatives.

Unit 5:

Sustainable Maintenance Practices:

- Environmental Impact of Maintenance Operations.
- Sustainable Practices in Maintenance.
- Compliance with Regulatory Standards.
- Training and Development for Sustainable Maintenance.
- Future Trends in Maintenance Efficiency and Sustainability.
