HR ANALYTICS

A group of four smiling business professionals (two men and two women) are seated at a table in a meeting room. They are all wearing white shirts. The woman in the foreground is wearing a black top and a multi-strand necklace. The background is a bright, modern office environment.

HR ANALYTICS

REF: H1299 DATE: 2 - 6 September 2024 Venue: Bangkok (Thailand) - JW Marriott Bangkok Fee: 6960 Euro

Introduction:

HR Analytics is the use of people-data in analytical processes to drive organizational success by evaluating and designing better systems and solving business problems. Critically, it enables evidence-based decisions to be made using data collected and synthesized from a variety of sources both within and outside the organization. HR analytics uses people-data, collected by HR systems and business information systems within the context of the operating environment. At its core, HR analytics enables HR professionals and the organization to gain insights into the performance of the workforce so that the investment in the "Human Capital" brings improved performance, higher productivity and guarantees the organization is ahead of the competition.

HR analytics enables HR and the major stakeholders to measure and report on workforce performance, well-being, productivity, innovation, and alignment. Additionally, analytics allows HR teams to demonstrate the impact that HR policies and processes have on the workforce and organizational performance and used to demonstrate ROI and SROI investment for HR activity. Line managers are increasingly interested in how to manage their teams more effectively; HR concepts and analytics demonstrate how to evaluate and improve people and business performance.

Course Objectives:

At the end of this course the participants will be able to:

- Understand the fundamental changes in the operating environment
- Conduct analysis of data for predictive and corrective planning
- Define the principles of organizational change
