Airport Strategic Planning

A group of four smiling business professionals (two men and two women) are seated at a table in a meeting room. They are all wearing white shirts. The woman in the foreground is wearing a black top and a multi-strand necklace. The background is blurred, showing a modern office environment.

1 - 5 December 2024
Dubai (UAE)

Airport Strategic Planning

REF: N1489 DATE: 1 - 5 December 2024 Venue: Dubai (UAE) - Fee: 5830 Euro

Introduction:

This interactive training program will highlight the strategic view of the airport components, planning, and management. It explores some advanced topics e.g. ACDM influencing the Aviation environment where many airlines, ground handlers, air traffic management units exist. This training course highlights the ICAO regulation and economic consideration for the purpose of improvement continuity.

Program Objectives:

At the end of this program the participants will be able to:

- Understand airport ownership characteristics globally and the differences between US and international airports.
- Explore recommended airport organization charts and the diverse array of jobs within airport operations.
- Describe the facilities present on airport airfields, including various types of runways.
- Discuss the influence of air traffic control on airport management and commercial air carrier operations.
- Differentiate security procedures between commercial service and general aviation airports.
- Define both aeronautical and non-aeronautical revenue streams generated by airports.
- Describe the intricate relationships between airport management and the airlines they serve.
- Gain insight into various airport planning studies, including the concept and implementation phases of Airport Collaborative Decision Making A-CDM.

Targeted Audience:

- Civil Aviation Authorities Middle and Top management staff.
- Airport and Airline staff related to Middle & Top management and operations.
- Participants conducting Airport planning and Design.

Program Outlines:

Unit 1:
