Strategic Energy Management Using BS EN
16001 and ISO 50001

A group of four smiling business professionals (two men and two women) are seated at a table in a meeting room. They are all wearing white shirts. The woman in the foreground is wearing a black top and a multi-strand necklace. The background is a bright, modern office environment.

- Electrical Supervisors.
- Power Engineers.
- Managers in-charge of electrical installations.
- Project Engineers.
- Quality Professionals.

Program Outline:

Unit 1:

Energy Overview:

- Energy & the Environment.
- Energy laws, regulations, and procedures.
- Energy Language.
- Carbon Emissions.
- Energy Standards.
- Energy applications.

Unit 2:

Energy Data & Management:

- Invoices.
- Metering.
- Data manipulation and interpretation.
- Management output.
- Using data.
- Evaluation Management competency.

Unit 3:

Energy Auditing / Review:

- Auditing process.
- Simple Auditing.
- Management Auditing.
- Detailed Auditing.
- Process Assessment.
- Equipment and activity Assessment.

Unit 4:

Monitoring and Targeting:

- Using raw data.
- Establishing connections with activity levels.
- Benchmarks / KPIs.
- Regression Analysis and CuSum.
- Establishing budgets and targets for consumption.
- Automatic Monitoring & Targeting / Reporting.

Unit 5:

People Power:

- Sources of help & guidance.
- Enrolling staff members.
- Making Policy & Strategy work.
- Partnerships.
- Information / communication.
