Fast Closing Month-end & Year-end Accounts

REF: F189 DATE: 3 - 7 November 2024 Venue: Cairo (Egypt) - Fee: 3520 Euro

Introduction:

This program provides an in-depth overview of the "Fast Close" process, which is the ability of a modern, global organization to rapidly close the accounting books, collect, consolidate and, then, publish its financial statements. This process is widely viewed not only as an indicator of management's abilities to execute its strategic plan in light of the availability of fast, reliable financial information but also as a proxy for good, well-implemented corporate governance. This course will also review the mounting concerns and evidence that the "Fast Close" process, after a long period of sustained improvement, is now in a period of decline, due in large part to the impact of compliance, new accounting and reporting standards, and the sheer increase in the volume and complexity of financial information that needs to be consolidated and reviewed.

Course Objectives:

At the end of this course the participants will be able to:

- Understand the importance of the fast close process on financial and operational decision-making within an organization
- Examine fast close processes, strategies, and best practices as well as consideration of organizational documentation policies and procedures
- Understand the importance of departmental requirements for financial reporting as well as the need for on-going improvements to the closing process
- Provide faster and more accurate data for monthly and year-end account closings to enhance communication with internal and external financial statement users
- Utilize assessment tools to pinpoint the disconnect between finance and internal users
- Consider organizational policies, procedures, and documentation related to a fast close
- Consider the departmental requirements for financial reporting
