HR Metrics and Analytics

A group of four smiling business professionals (three men and one woman) in a meeting room. The woman in the foreground is wearing a black top and a multi-strand necklace. The men are wearing white shirts. They are all looking towards the camera with pleasant expressions. The background is a blurred office setting with large windows.

HR Metrics and Analytics

REF: H1439 DATE: 28 October - 1 November 2024 Venue: Baku (Azerbaijan) - Holiday Inn Baku Fee: 5830 Euro

Introduction:

The HR function is a high-value-added part of the organization and plays a key role in developing and implementing corporate strategy. This is because of the growing importance of human capital in organizational success.

The HR function needs to be more effective as a strategic partner in the organization rather than a purely administrative function. Such an HR function will drive and deliver change rather than just react to it.

To achieve this highly desired prize, the HR function must develop its ability to measure how HR decisions affect the organization and how the decisions taken by the organization affect human capital. In short, the HR function needs to develop better metrics and analytics if it is to become a true strategic partner.

Once the metrics are established, the organization will need to develop HR policies that react to the messages. The course will also consider the type of HR policies that are being developed in response to the usual range of messages from the metrics and analytics.

Course Objectives:

At the end of this course the participants will be able to:

- Examine the use of internal and external measurement frameworks which establish the contribution of the HR function
- Conduct detailed Problem analysis assessments
- Identify appropriate Decision-Making options
- Make decisions based on evidence rather than opinion
- Understand the principles of Organisation change
- Understand the theory around organizational change
- Drive strategic change rather than react to it
