Climate Finance and Adaptation Building

REF: F2292 DATE: 22 - 26 July 2024 Venue: Lisbon (Portugal) - Fee: 5940 Euro

Introduction:

The Climate Finance and Adaptation Building Training is designed to provide participants with a comprehensive understanding of climate finance mechanisms and strategies for building adaptation measures. The training aims to equip participants with the knowledge and skills necessary to effectively navigate the complex landscape of climate finance and implement adaptation initiatives.

Course Objectives:

At the end of this course, participants will be able to:

- Understand the fundamentals of climate finance and its role in supporting climate change adaptation.
- Explore various sources of climate finance, including international funds, public-private partnerships, and innovative financing mechanisms.
- Learn how to identify and assess climate finance opportunities for adaptation projects.
- Gain insights into the best practices and strategies for accessing and mobilizing climate finance.
- Develop skills in project design, proposal writing, and financial management for climate adaptation initiatives.
- Understand the principles of monitoring, evaluation, and reporting for climate finance projects.
- Analyze case studies and real-world examples to learn from successful climate finance and adaptation projects.

Targeted Audience:

- Government officials and policymakers responsible for climate finance and adaptation planning.
- Development practitioners working in the field of climate change and sustainability.
- Project managers and professionals from NGOs and international organizations.
- Private sector representatives interested in understanding climate finance opportunities.
- Researchers and academics seeking to expand their knowledge in climate finance and adaptation.

Course Outlines
