Introduction

"Speed to market" and "speed of execution" are of the utmost significance in this unstable and challenging business environment that we work in. Both the speed and the quality of execution are supported by OKRs. OKR is an agile goal-setting framework that, in order to be successful and last, needs strong leadership and a growth culture. Effective OKRs must be set, but if they are not carried out well or at all, they are useless. You will learn how to guide your team toward OKR execution and fulfill the company's vision in this incredibly useful OKR leadership training.
