Modern Methods in Strategic Planning and Building Performance Indicators

REF: ST1413 DATE: 4 - 8 November 2024 Venue: Kuala Lumpur (Malaysia) - Fee: 5300 Euro

Introduction:

During the planning process, the temptation is always to spend most of the time working on the business, discussing the big picture strategic plans and breakthrough developments that are critical to the future of the company. Only looking at long-term plans ignores a critical part of the planning process: Defining the annual goals and key performance indicators, KPIs, which will be relevant in the day-to-day running of the business to turn those high-level goals into reality. This may seem too detailed of an exercise to make it a big part of your annual strategy meeting, but it requires just as much focus and attention as your big-picture plans if they are ever going to be realized.

What is the secret of the continued success of some institutions in meeting the expectations of stakeholders compared to others? Why does the performance record of some institutions fluctuate up and down? The strategic perspective of these institutions is the key factor in their success.

This training course is structured into many effective frameworks, tools, and methods in strategic planning and implementation. Participants will be able to identify the real reasons for successful long-term strategic performance and will be able to adopt successful approaches in their institutions.

On the other hand, this course will cover the seven steps of the strategy management process, from strategic "thinking" elements to "planning" and "implementation". Participants at the end of the course will be able to implement or improve the strategic process in their institutions to reach the vision of the institution and achieve its mission.

Targeted Audience:

The course is designed for managers at all levels, corporate officers, and coordinators who are involved in the development and implementation of the organization's plans through which to achieve their strategic goals and objectives.

Course Objectives:

At the end of this course the participants will be able to:

- Effective implementation of strategic management through the use of strategic thinking and effective planning tools and methods
- Employing models and frameworks for strategic analysis of the external environment of the institution
