Labor Economics

REF: F2031 DATE: 9 - 13 December 2024 Venue: London (UK) - Fee: 5300 Euro

Introduction:

This training program delves into the key principles and analytical methods of labor economics, focusing on labor markets, employment, and wage determination. It provides participants with a comprehensive understanding of labor market dynamics and the factors influencing labor supply and demand. It empowers them to apply labor economics concepts to analyze labor market trends and inform policy decisions.

Program Objectives:

By the end of this program, participants will be able to:

- Understand the fundamental concepts and theories in labor economics.
- Analyze labor market trends and employment data.
- Evaluate the impact of economic policies on labor markets.
- Apply analytical methods to wage determination and labor supply.
- Address labor market issues and formulate effective policy recommendations.

Targeted Audience:

- Economists.
- Human Resources Professionals.
- Policy Analysts.
- Labor Market Researchers.
- Economic Consultants.
