Conference on Accountants Forum

REF: C2469 DATE: 7 - 11 October 2024 Venue: London (UK) - Landmark Office Space Fee: 5850 Euro

Introduction:

This conference aims to provide participants with a set of knowledge about the evolution of financial information systems in the face of increasing financial risks within business organizations. It will highlight the role of accounting in supporting investment and economic growth, emphasizing its role in enhancing integrity and addressing modern trends and challenges in the accounting profession amidst the digital revolution.

Conference Objectives:

By the end of the conference, participants will be able to:

- Enhance their knowledge about the evolution of financial information systems amidst increasing financial risks within business organizations.
- Apply knowledge of the new International Financial Reporting Standards IFRS and understand the changes accompanying the implementation of these standards on international and Arab business environments.
- Utilize and benefit from financial reports through critical analysis, enabling judgment on the financial strength and stability of organizations and contributing to informed managerial decisions.
- Forecast future financial performance and report on instances of financial success or failure within organizations, reviewing financial restructuring approaches.
- Identify professional issues arising from the implementation of certain accounting treatments for various accounting standards.
- Use a range of modern financial tools to determine budgetary allocations in financial risk management.
- Apply skills in dealing with real-world problems in practical financial risk management applications.

Target Audience:

- Accounting department managers and financial managers.
- Accountants and auditors across all sectors.
- Providers of accounting and auditing technology programs.
- Relevant government and private entities.
- Local and international accounting firms and offices.
