Card Payment System

REF: T2470 DATE: 14 - 18 October 2024 Venue: Amsterdam (Netherlands) - Fee: 5565 Euro

Introduction:

This training program is designed to equip banking professionals with comprehensive knowledge and practical skills regarding payment systems and processes. It offers insights into various payment methods, security measures, and regulatory frameworks governing payment transactions within the banking sector.

Program Objectives:

At the end of this program, the participants will be able to:

- Familiarize themselves with various payment instruments and channels used in banking operations.
- Enhance their understanding of payment system architecture, including clearing and settlement mechanisms.
- Gain knowledge about the regulatory landscape governing payment transactions and compliance requirements.
- Develop skills to identify and mitigate payment-related risks and fraud.
- Apply practical insights and case studies for the effective implementation of payment solutions within banking operations.

Targeted Audience:

- Payment operations managers.
- Retail banking managers.
- Compliance officers.
- Risk management professionals.
- Customer service representatives.
- IT and technology specialists involved in payment systems.

Program Outline:

Unit 1:

Fundamentals of Payment Systems:

- Introduction to payment systems and their importance in banking.
- Overview of payment instruments: cash, checks, cards, electronic funds transfer EFT.
- Understanding payment system participants: banks, customers, clearinghouses, regulators.
- Types of payment channels: branch, ATM, online banking, mobile banking.

Unit 2:
