Retail Credit Risk and Credit Scoring

REF: T2046 DATE: 3 - 7 February 2025 Venue: Lisbon (Portugal) - Fee: 5940 Euro

Introduction:

Retail credit risk management is critical for ensuring the stability and profitability of lending operations, particularly in the context of increasing consumer borrowing. Credit scoring provides an essential tool for assessing borrower risk and making informed lending decisions. This training program equips participants with the knowledge and techniques to identify, measure, and mitigate retail credit risk using advanced credit scoring models and strategies, ensuring sound and sustainable lending practices.

Program Objectives:

By the end of this program, participants will be able to:

- Explore the fundamentals of retail credit risk and its impact on financial institutions.
- Develop and apply effective credit scoring models.
- Analyze borrower creditworthiness using quantitative and qualitative methods.
- Implement risk mitigation strategies in retail lending.
- Ensure compliance with regulatory requirements for credit risk management.

Target Audience:

- Credit Risk Analysts.
- Retail Banking Professionals.
- Loan Officers and Underwriters.
- Risk Management Specialists.
- Financial Analysts and Credit Managers.
