Corporate Credit Analysis

REF: T2043 DATE: 7 - 11 December 2025 Venue: Manama (Bahrain) - Fee: 4475 Euro

Introduction:

Corporate credit analysis is a critical process for evaluating the creditworthiness of businesses and ensuring sound lending decisions. It involves assessing financial statements, understanding business risks, and applying analytical techniques to determine a company's ability to meet its obligations. This training program provides participants with a comprehensive understanding of corporate credit analysis, covering key concepts, risk assessment methods, and tools for making informed credit decisions.

Program Objectives:

By the end of this program, participants will be able to:

- Explore the fundamentals of corporate credit analysis.
- Evaluate financial statements to assess a company's creditworthiness.
- Identify key business and industry risks.
- Apply credit risk assessment techniques and models.
- Make informed credit decisions and recommendations.

Target Audience:

- Credit Analysts.
- Corporate Banking Professionals.
- Risk Management Officers.
- Financial Analysts.
- Investment Analysts.

Program Outline:

Unit 1:

Introduction to Corporate Credit Analysis:

- Definition and importance of corporate credit analysis.
