# Conference on Safety Technology and Risk Management

REF: C641 DATE: 17 - 21 February 2025 Venue: Barcelona (Spain) - Fee: 6145 Euro

## Introduction:

This conference is designed to equip professionals with the knowledge and skills to leverage modern safety technologies and implement effective risk management strategies. It focuses on integrating technology into safety practices and mitigating risks in various industries. It empowers participants to enhance workplace safety, minimize hazards, and ensure compliance with industry regulations through proactive risk management and technological solutions.

## Conference Objectives:

By the end of this conference, participants will be able to:

- Understand the role of modern technology in improving safety practices.
- Identify and assess risks using advanced risk management frameworks.
- Implement safety technologies to prevent accidents and reduce hazards.
- Develop risk mitigation strategies that align with organizational safety goals.
- Ensure compliance with safety regulations through the use of technology.

## Targeted Audience:

- Safety Managers.
- Risk Management Professionals.
- Health and Safety Officers.
- Operations Managers.
- Industrial Engineers.

## Conference Outline:

### Unit 1:

#### Introduction to Safety Technology:

- Overview of modern safety technologies and their role in risk management.
- The impact of automation, AI, and IoT on workplace safety.

- Key safety technologies: wearables, sensors, and real-time monitoring systems.
- Integrating safety technology into existing operational processes.
- Understanding the cost-benefit of adopting new safety technologies.

## Unit 2:

### Risk Identification and Assessment:

- Techniques for identifying risks in various operational environments.
- Conducting hazard assessments using risk management tools.
- The role of predictive analytics in risk identification.
- Prioritizing risks based on probability and impact.
- Developing a risk register to track and manage identified risks.

## Unit 3:

### Implementing Safety Technology Solutions:

- Using real-time monitoring systems to track safety performance.
- Implementing safety automation to reduce human error and enhance safety.
- Case studies of successful implementation of safety technologies.
- Training employees to effectively use safety technology tools.

## Unit 4:

### Developing Risk Mitigation Strategies:

- Developing comprehensive risk mitigation plans based on risk assessments.
- Integrating safety technology into risk mitigation efforts.
- Reducing workplace hazards through proactive safety interventions.
- Monitoring and adjusting risk mitigation strategies using technology.
- Ensuring organizational alignment with risk management goals.

## Unit 5:

## Compliance and Continuous Improvement:

- Ensuring compliance with safety standards and regulations using technology.
- Leveraging safety data and reporting tools for regulatory audits.
- Continuous improvement strategies for maintaining a high level of safety.
- The role of data-driven decision-making in improving safety outcomes.
- Long-term strategies for evolving safety technologies and practices.
