Digital Transformation: Platform strategies for
Success

A group of four smiling business professionals (three men and one woman) are seated at a table in a meeting room. They are all wearing white shirts. The woman in the foreground is wearing a black top and a multi-strand necklace. The background is a bright, modern office environment.

Digital Transformation: Platform strategies for Success

REF: ST2247 DATE: 1 - 5 September 2024 Venue: Manama (Bahrain) - Fraser Suites Seef Bahrain Fee: 4925 Euro

Introduction

Digital transformation is the process of using digital technologies to fundamentally change the way an organization operates. This can include changes to the way the organization delivers its products or services, the way it interacts with its customers, or the way it manages its operations.

Platform strategies are a key part of digital transformation. A platform is a set of digital technologies that enable organizations to connect with their customers, partners, and suppliers in new ways. Platforms can be used to create new products and services, to improve the efficiency of existing operations, or to create new markets.

Course Objectives

By the end of this course, participants will be able to:

- Understand the concept of digital transformation
- Identify the benefits of using platform strategies
- Develop a platform strategy for their organization
- Implement and manage a platform strategy

Targeted Audience

This course is designed for anyone who is interested in learning about digital transformation and platform strategies. It is ideal for managers, executives, and other leaders who are responsible for the strategic direction of their organization.
