## Introduction:

Effective strategic planning is essential to the future success of any organization. However, most strategic planning is lacking in vision. It is merely a straight-line extrapolation of the past into the future. In a world where the pace of change is greater than ever before this is at best shortsighted and at worst a prescription for disaster. Real strategic planning is about positioning the organization for a future that will be different from the past. This new seminar will focus on strategic planning as the essential management system guiding the organization into the future by setting focused goals that will establish and enhance competitiveness.
